

New Build at Sevenoaks:

Demolishment of an existing house and build 550m² (5300 ft²) 6 bedroom with all ensuite, including 90m² of basement playroom/cinema room. It is built using cavity construction on 10 meter deep piling foundations load bearing slab. We also had to install gas membrane as a protection to overcome contaminated ground conditions. The project will have under floor heating throughout and polished concrete flooring. There will be CCTV and intercom connected main gate. AVF will be carrying out all external works including landscaping, driveway and all patios.
